PROFESSIONAL SUMMARY

Results-driven Senior Web Developer with 9 years of experience building scalable, high-performance web applications across healthtech, fintech, and enterprise domains. Proficient in React.js, Angular, TypeScript, JavaScript, HTML5, and CSS3. Proven track record of delivering measurable improvements in load speed, operational efficiency, and user engagement. Authorized to work in the US (H4 EAD). Actively seeking Frontend or Full-Stack Web Developer roles in the Greater Los Angeles / Ventura County area.

TECHNICAL SKILLS

Frontend: React.js, Angular, JavaScript (ES6+), TypeScript, HTML5, CSS3, SASS, jQuery, Ext.js

Backend & Cloud: Node.js, AWS (EC2), MySQL 5.7, REST APIs

Libraries & Tools: Cornerstone.js, Hammer.js, Raphael.js, jqPlot, Datatables, Chart.js

DevOps & Testing: Jenkins, SonarQube, GitHub, SVN, Selenium, TestNG

Methodologies: MVC Architecture, Agile/Scrum, Cross-browser Compatibility, Responsive Design

PROFESSIONAL EXPERIENCE

Independent Web Developer (Freelance) | Self-Employed | Newbury Park, CA 2020 – Present

- Built and deployed production React.js web applications including a Recipe App, E-Commerce Bookshop App, and JSON Table Generator. Practiced modern React hooks, component architecture, and responsive CSS3 layouts to stay current with industry standards.

Senior Web Developer | Bank of America Continuum India Pvt Ltd | Chennai, India 2019 – 2020

Quartz UI — Desktop to Web Migration

- Spearheaded the migration of Quartz UI from a Windows Desktop application to a modern Web UI, improving average page load speed by 38%.
- Reduced operational costs by 26% by redesigning data exchange and information distribution systems.
- Built a reusable React.js and JavaScript component library, cutting project workload by 35% across multiple teams.
- Facilitated quick access to the records bureau by streamlining navigation and data retrieval flows.

Senior Web Developer | Samsung R&D Institute | Bangalore, India

2016 – 2018

HME – IOTA-ADNEX (Health & Medical AI)

- Designed and developed a clinical UI console enabling physicians to assess malignancy probability of ovarian tumors from DICOM scan inputs.
- Improved data visualization and clinical decision-making by 43% by building complex bar and radar charts to illustrate benign vs. malignant tumor probability.
- Architected the full frontend using MVC model in React.js; subsequently re-implemented the app in Angular for dual-platform delivery.
- Mentored junior developers, resulting in a 37% reduction in bug reports during Angular implementation.
- Received SPOT AWARD (2018) for efficient delivery of the IOTA-ADNEX application.

Senior Web Developer | Samsung R&D Institute | Bangalore, India

2016 – 2017

HME – Remote Rendering (Fetal Imaging)

- Designed and implemented UI architecture to display interactive 2D and 3D fetal images with annotation and image rendering capabilities using the Cornerstone.js library.
- Boosted user satisfaction scores by 38% through an enhanced interactive experience with customizable presets via HTML5 Canvas.
- Modularized the application for full cross-browser compatibility on mobile devices using Hammer.js.
- Optimized MySQL database queries, improving data retrieval time by 34%.

Web Developer | Samsung R&D Institute | Bangalore, India

2015 – 2016

CT Service — Config & Diagnostics UI

- Built the Web UI for Config, Diagnostics, Calibration, and Reports modules for CT machine management.
- Developed a custom JavaScript pagination library that reduced medical repository load time by 43% and increased user engagement by 26%.
- Created a custom graph library for visualizing diagnostics and calibration parameters; used Cornerstone.js for ROI annotation on DICOM images.
- Received EMPLOYEE OF THE MONTH and SPOT AWARD (2016) for outstanding delivery.

Web Developer | Samsung R&D Institute | Bangalore, India

2014 – 2015

Techwin — Security Camera Platform

- Developed a Web 'Open App' to streamline firmware installation and uninstallation on security camera systems, boosting operational efficiency by 65%.
- Built comprehensive health metrics for uploaded apps, giving users real-time insights that led to a 36% reduction in bugs.
- Developed a Motion Detection app supporting Play, Delete, Start, and Stop video actions.

Software Programmer | Samsung R&D Institute | Bangalore, India

2013 – 2014

vCDN — Virtual Content Delivery Network

- Built a virtual CDN integrating vNodes and client nodes on Amazon EC2.
- Implemented a centralized controller that increased network performance by 43% and enabled robust scalability.

Software Programmer | Cognizant Technology Solutions | Chennai, India

2011 – 2012

Sears E-Commerce — Automation Testing

- Developed a regression automation tool using Selenium, TestNG, Jenkins, Java, HTML5, JavaScript, and jQuery for Sears, Kmart, and My Gofer websites.

Software Programmer | Cognizant Technology Solutions | Chennai, India

2010 – 2011

Walmart — Cart & Checkout Optimization

- Contributed to migration from Struts to Spring Web Flow framework; handled maintenance and bug fixing of checkout modules using Java, HTML5, JavaScript, CSS, and jQuery.

EDUCATION

B.E. Computer Science — PSG College of Technology, Coimbatore, India

2006 – 2010

GPA: 8.6 / 10.0
